# YONATAN AWOKE

## Flutter Mobile Developer

■ yoni13awoke@gmail.com    ■ +251-955-178-307    ■ Debre Markos, Ethiopia    ■ github.com/yo13ni

## EDUCATION

**Debre Markos University — Ethiopia**
Bachelor's Degree in Software Engineering
Expected Graduation: 2026 (5th Year Student)

## ABOUT ME

Flutter Mobile Developer and Software Engineering student with hands-on experience in building modern, scalable, and user-friendly mobile applications. Experienced in Flutter, Dart, and Supabase (PostgreSQL), with strong skills in converting Figma designs into clean, responsive Flutter interfaces. Passionate about continuous learning and delivering high-quality solutions.

## PROFESSIONAL EXPERIENCE

**Flutter Mobile Developer — Toriance PLC**

*Asbeza Kesuq Project*

• Developing a production-level mobile application using Flutter and Dart.
• Integrating backend services using Supabase with PostgreSQL.
• Implementing authentication, data fetching, and CRUD operations.
• Collaborating with team members to deliver stable, user-focused features.

## PROJECTS

**Mezmur debter** :is a mobile application that provides users with a comprehensive digital hymnbook of Ethiopian Christian worship songs (mezmur). The goal of the app is to make it easy for believers to access lyric content and musical resources offline anywhere, anytime.

**EEU Telegram Bot:** Complaint handling bot built with Node.js and Telegram Bot API.
s a service automation bot designed to help customers of the **Ethiopian Electric Utility (EEU)** easily submit complaints and meter readings through Telegram.
The bot simplifies communication between users and the utility provider by providing a fast, accessible, and user-friendly interface directly inside Telegram.

**Tom Cat Gallery App:** s a Flutter-based mobile application that displays a gallery of cat images fetched dynamically from a public Cat API.
The app focuses on demonstrating **REST API integration**, **JSON parsing**, and **clean, responsive UI development** using Flutter

## SKILLS

**Html/css**

**Git/Github**

**Flutter/Dart**
